Noblesville, Indiana

SUMMARY

Technical implementation engineer with 7+ years in IT, nearly all of it at managed service providers (MSPs). Owns client onboarding from discovery through deployment, QA and handoff to support, coordinating engineers, vendors, timelines and client expectations along the way. Good at spotting technical gaps, explaining complex issues in plain terms and building repeatable processes that get projects finished. Also co-founded MyGolfLinks, a golf technology platform, and leads its product and release work.

- Promoted from Onboarding Coordinator to Client Transition Engineer at Harbor IT in 14 months.
- Runs 2 to 4 client transitions at a time for environments of 10 to 500 users.
- Hands-on with 30+ MSP platforms across security, identity, endpoint management, networking and backup.

TECHNICAL SKILLS

Delivery	Client onboarding, technical discovery, implementation planning, project coordination, quality assurance, support handoff, technical documentation, SOP development
Security & Identity	SentinelOne, ThreatLocker, Huntress, Blackpoint, Quadrant XDR, Duo, CyberQP, KnowBe4, Barracuda Email Security, Avanan, DNSFilter, identity and access management
Cloud & Endpoint	Microsoft 365, Google Workspace, Microsoft Intune, Jamf, Addigy, N-able N-central, Take Control, ConnectWise, RemotePC, Active Directory, Windows, macOS, iOS
Networking	Fortinet, FortiClient, Meraki, Ubiquiti/UniFi, Auvik, VPNs, DNS, DHCP, firewalls, switches, wireless, patch management
Backup & Docs	Cove Data Protection, Barracuda Cloud-to-Cloud Backup, Veeam, Axcient, Hudu, Liongard, Lifecycle Insights, knowledge base development
Product & Automation	Cloudflare Workers, Supabase, GitHub, Stripe, REST APIs, React Native, Power Automate, QA and release coordination

EXPERIENCE

Harbor IT | Remote — Feb 2025 – Present

Client Transition Engineer — Apr 2026 – Present

- Own new client transitions from post-sale discovery through implementation, final QA and handoff to support, serving as the main technical contact for the client and internal teams.
- Assess client environments, including users, vendors, networks, Microsoft 365, security platforms, backups and existing documentation, and turn the findings into a clear implementation plan.
- Deploy and validate endpoint security, RMM, backup, email security, identity, networking, monitoring and documentation tools for clients from 10 to 500 users.
- Run a final technical review before each handoff to catch security gaps, missing documentation, unsupported configurations and incomplete deployments.
- Manage 2 to 4 onboarding projects at once, coordinating engineers, account management, vendors and third-party providers while keeping customers updated.
- Work onboarding issues through to resolution with the security, network, cloud and support teams.
- Build and maintain the onboarding SOPs, checklists and client communication templates the team uses for new client transitions.

Onboarding Coordinator — Feb 2025 – Apr 2026

- Coordinated new client onboarding from kickoff through support handoff, including schedules, documentation requests, dependencies and customer communication.
- Scheduled deployment work with the networking, cybersecurity, cloud, backup and endpoint teams and kept open items moving.

- Gathered and documented client environment details, including vendors, credentials, networks, applications and existing IT processes.
- Helped build the team's onboarding SOPs and templates and took on more technical ownership, earning promotion to Client Transition Engineer.

Braden Business Systems | Fishers, Indiana — May 2021 – Feb 2025

Technical Alignment / Onboarding Specialist (Hybrid) — Oct 2023 – Feb 2025

- Led onboarding and technical alignment for managed-services clients as a regular point of contact between customers, sales, leadership and engineering.
- Coordinated transitions from previous IT providers, covering endpoint, identity, network, backup and security services.
- Ran recurring client environment reviews to find security, documentation and reliability issues, and walked customers through the recommended fixes.
- Maintained technical documentation, helped clients adopt the managed-services toolset and stayed involved after go-live.

Technical Onboarding Specialist — Jul 2022 – Oct 2023

- Coordinated new client onboarding and deployment of the managed-services technology stack.
- Collected and verified environment information, credentials, vendor contacts and documentation before implementation.
- Helped deploy and validate endpoint, security, cloud, backup and monitoring tools, working with engineers to clear issues and keeping customers updated on status and blockers.

Service Desk Analyst — May 2021 – Jul 2022

- Provided remote and onsite support for Windows, macOS, Microsoft 365, hardware, networking and user access across multiple client organizations.
- Troubleshot endpoint, application, printer, connectivity, permission and account issues, documented each resolution and escalated complex issues.

Fetzerhaus Technology, Inc. | Indianapolis, Indiana — Nov 2019 – Apr 2021

Systems Engineer

- Supported desktops, laptops, mobile devices, applications and client networks (switches, routers, wireless, VPNs and firewalls) across multiple client organizations.
- Managed Active Directory users, groups, permissions and access, and installed and configured hardware and software.

Carmel Clay Schools | Carmel, Indiana — Mar 2019 – Nov 2019

Computer Technician

- Deployed and supported end-user devices, classroom technology, applications and peripherals across the district.

PRODUCT & PLATFORM EXPERIENCE

MyGolfLinks LLC | Golf technology platform for players, courses and partners | Remote — Present

Co-Founder / Product & Technical Lead

- Turn product ideas and user workflows into clear requirements and development priorities.
- Coordinate development, testing, security review and releases across React Native, Cloudflare Workers, Supabase, Stripe, GitHub and REST APIs.
- Plan platform features, including permissions, data workflows, course operations, payments and admin tools.
- Test new features, document issues, coordinate fixes and set release priorities.

EDUCATION

Bachelor of Science, Computer and Information Technology — 2018
Purdue School of Engineering and Technology, Indianapolis, Indiana
